## Description

*Provide a short description of the event and its activities.*

Cinisello Balsamo organized two identical workshops with two different classes in a high school in Cinisello Balsamo.

During the workshops, they did different activities:

The first activity was to ask the students some questions about their personal use of digital tools and how their approach has changed during the pandemic. The answers were structured as multiple-choice, and based on the answer the guys had to move around the posters in the room.

Then, they presented the project and its goals and we created a moment of discussion on the topic of active digital participation.

Both groups were given the same activities but it was very interesting to see how in each of the two the responses and results were very different.
