

3TH Year architecture design

2017-2021

Milano - Politecnico

Welcome to my portfolio. I'm Issa, an architect enthusiastic, a student from Politecnico university. Architecture is my passion and I believe it is about resolving issues and creating solutions.

Designing building which achieves both functional aesthetics, as well as enhances human's life. Hence, I'm eager to develop my skills, knowledge and personality in order to make contribution to the communities, societies and the world. During my studies and working experiences I have been trained to work hard under pressure. I've learned that this passion and perseverance are the key values to success.

It helps me to face and solve new challenges every day.

Best teaching with:

- Paolo Mazzoleni
- Oscar Eugenio Bellini
